Accommodation & Venue

Accommodation of conference participants will be provided at the Rydzyna Castle.

<http://zamek-rydzyna.com.pl>

The castle is located in close proximity to the capital of Greater Poland, Poznań.
GPS: 51.787737, 16.670931

We invite you to the Castle in Rydzyna. Its history shows the international ties of our Greater Poland region in the mutual cultural and technical development of Europe. The beginning of the castle is a medieval defensive fortress, on its remains in the years 1680-1695 the present buildings were built.

Destroyed in times of wars, rebuilt in times of peace, today they invite you to share stories about history and the future. We will be very pleased to meet you in such an interesting place and talk about the further development of technical sciences.

Poznan University of Technology is an university with over 100 years of tradition. During this time it has been rapidly developing and nowadays it consists of nine faculties, which educate over 14,600 students. The nature of the university has always been associated with the needs of the development of the industry in Greater Poland and the City of Poznań, which nooks and crannies we will gladly show you.

Main Topics

- Methods and systems in machine design.
- Modelling and simulation, structural optimization.
- Machine dynamics and multibody systems simulations.
- Advanced industrial, automotive and green energy applications.
- Experimental mechanics, identification and validation.
- Modelling of structural materials, composites and nanomaterials.
- Physical and chemical properties of materials.
- Theoretical and applied mathematics in engineering.
